This summary includes all the Elements required to be included for the Notes and the Issuer. As some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements. Even though an Element may be required to be inserted in this summary because of the nature of the Notes and the Issuer, it is possible that no relevant information can be given regarding each Element. In this case, a short description of the Element is included in the summary and marked as “Not Applicable”.

Section A – Introduction and warnings		
A.1	Warning:	<p>This Summary must be read as an introduction to the Prospectus and any decision to invest in the Notes should be based on a consideration of the Prospectus as a whole by the investor, including the documents incorporated by reference.</p> <p>Civil liability in respect of this Summary, including any translation thereof, will attach to the Issuer in any Member State of the EEA in which the relevant provisions of the Prospectus Directive have been implemented, but only if this summary is misleading, inaccurate or inconsistent when read together with the other parts of the Prospectus or it does not provide, when read together with the other parts of the Prospectus, key information in order to aid investors when considering to invest in the Notes.</p> <p>Where a claim relating to the information contained in the Prospectus is brought before a court in such Member State, the plaintiff investor may, under the national legislation of that Member State, have to bear the costs of translating the Prospectus before the legal proceedings are initiated.</p>
A.2	Consent to use the Prospectus for subsequent resales or final placement of the Notes by financial intermediaries	The Issuer has not expressed its consent to the use of the Prospectus for subsequent resales or placements of the Notes.
Section B – Issuer		
B.1	The legal and commercial name of the Issuer:	ING Bank N.V. (the “Issuer”)
B.2	The domicile and legal form of the Issuer, the legislation under which the Issuer operates and its country of incorporation:	The Issuer is a company with limited liability (<i>naamloze vennootschap</i>) incorporated under the laws of the Netherlands with its corporate seat in Amsterdam, The Netherlands. The Issuer is registered at the Chamber of Commerce of Amsterdam under no. 33031431.
B.4b	A description of any known trends affecting the Issuer and the industries in which it	2011 saw a marked deterioration in the debt and equity markets amid a slowdown of the macroeconomic environment and a deepening of the sovereign debt crisis in Europe. ING continued to take a prudent approach to risk, increasing hedging to preserve capital and selectively reducing exposure to southern Europe. In this challenging environment, ING’s earnings have remained resilient, and its strong funding position enabled it to continue to

	operates:	<p>increase lending to support ING's customers in these uncertain times.</p> <p>A key factor in developing the updated banking strategy which was presented in January 2012 has been the changing regulatory environment. Regulatory reform for banks has been taking place both at supranational (in particular European) and national levels. ING favours a harmonised approach to new financial regulation in the EU, both with regard to drafting and transposition into national laws. This would minimise interference with the vital role banks have in supporting the real economy.</p> <p>In the short term, ING Bank's priorities are to generate capital and reach a core Tier 1 ratio of at least 10% by 2013 as measured by Basel III. With respect to Basel III, ING Bank's focus is also on the liquidity requirements to be met from 2013. After this transition period, ING Bank aims for moderate balance sheet growth in line with GDP growth and a strong focus on deposits generation. ING Bank wants to evolve ING Direct units into full banks and develop selected growth markets.</p> <p>The financial crisis of 2008/2009 and its impact on ING have made it necessary for ING to intensify the dialogue with, and rebuild trust among, all its stakeholders and society as a whole.</p>																																				
B.5	Description of the Group and the Issuer's position within the Group:	<p>The Issuer is part of ING Groep N.V. ("ING Group"). ING Group is the holding company for a broad spectrum of companies (together, "ING"), offering banking, investments, life insurance and retirement services to meet the needs of a broad customer base. Originating from The Netherlands, ING has a workforce of more than 97,000 people worldwide. ING Group holds all shares of ING Bank N.V., which is a non-listed 100% subsidiary of ING Group. On 26 October 2009, ING announced a new strategic direction. It will separate its banking operations and insurance operations (including investment management operations) and develop towards a mid-sized international bank, anchored in The Netherlands and Belgium, and predominantly focused on the European retail market with selected growth options elsewhere. On the same date, ING announced that all insurance operations (including investment management operations) would be divested over the following four years. ING conducts its banking operations principally through ING Bank and its insurance operations (including investment management operations) principally through ING Verzekeringen N.V. and its subsidiaries.</p>

Section D – Risks		
D.2	Key information on the key risks that are specific to the issuer:	<ul style="list-style-type: none"> • Because the Issuer is part of a financial services company conducting business on a global basis, the revenues and earnings of the Issuer are affected by the volatility and strength of the economic, business and capital markets environments specific to the geographic regions in which it conducts business. The ongoing turbulence and volatility of such factors have adversely affected, and may continue to adversely affect the profitability and solvency of the Issuer. • Adverse capital and credit market conditions may impact the Issuer's ability to access liquidity and capital, as well as the cost of credit and capital. • The default of a major market participant could disrupt the markets. • Because the Issuers' businesses are subject to losses from unforeseeable and/or catastrophic events, which are inherently unpredictable, the Issuer may experience an abrupt interruption of activities, which could have an adverse effect on its financial condition. • The Issuer operates in highly regulated industries. There could be an adverse change or increase in the financial services laws and/or regulations governing the Issuer's business. • Turbulence and volatility in the financial markets have adversely affected the Issuer, and may continue to do so. • Because the Issuer operates in highly competitive markets, including its home market, it may not be able to increase or maintain its market share, which may have an adverse effect on its results of operations. • Because the Issuer does business with many counterparties, the inability of these counterparties to meet their financial obligations could have a material adverse effect on the Issuer's results of operations. • Market conditions observed over the last year may increase the risk of loans being impaired. The Issuer is exposed to declining property values on the collateral supporting residential and commercial real estate lending. • Interest rate volatility and other interest rate changes may adversely affect the Issuer's

		<p>profitability.</p> <ul style="list-style-type: none"> • The Issuer may incur losses due to failures of banks falling under the scope of state compensation schemes. • The Issuer may be unable to manage their risks successfully through derivatives. • The Issuer may be unable to retain key personnel. • Because the Issuer uses assumptions to model client behaviour for the purpose of their market risk calculations, the difference between the realisation and the assumptions may have an adverse impact on the risk figures and future results. • The Issuer may incur further liabilities in respect of their defined benefit retirement plans if the value of plan assets is not sufficient to cover potential obligations, including as a result of differences between results and underlying actuarial assumptions and models. • The Issuer's risk management policies and guidelines may prove inadequate for the risks they face. • The Issuer is subject to a variety of regulatory risks as a result of their operations in certain countries. • Because the Issuer is continually developing new financial products, it might be faced with claims that could have an adverse effect on the Issuer's operations and net results if clients' expectations are not met. • Ratings are important to the Issuer's businesses for a number of reasons. Downgrades could have an adverse impact on the Issuer's operations and net results. • The Issuer's businesses may be negatively affected by a sustained increase in inflation. • Operational risks are inherent in the Issuer's businesses. • The Issuer's businesses may be negatively affected by adverse publicity, regulatory actions or litigation with respect to such businesses, other well-known companies or the financial services industry in general. • The implementation of ING's restructuring plan and the divestments anticipated in connection with that plan will significantly alter the size and structure of ING and involve significant costs and uncertainties that could materially impact the Issuers. • The limitations required by the EC on ING's ability to compete and to make acquisitions or call certain debt instruments could materially impact the Issuers. • Upon the implementation of its restructuring plan, ING will be less diversified and the Issuers may experience competitive and other disadvantages. • ING's Restructuring Programs may not yield intended reductions in costs, risk and leverage. • ING's agreements with the Dutch State impose certain restrictions regarding the issuance or repurchase of its shares and the compensation of certain senior management positions. • Whenever the overall return on the (remaining) Core Tier 1 Securities issued to the Dutch State is expected to be lower than 10% per annum, the European Commission may consider the imposition of additional behavioural constraints.

The liquidity of Reference Obligation will generally fluctuate with, among other things, the underlying liquidity of the loan and bond markets, general economic conditions, domestic and international political events, developments or trends in a particular industry and the financial condition of the Reference Entity. The financial markets have experienced periods of volatility and reduced liquidity which may re-occur and reduce the market value of the relevant Reference Obligation. • The Reference Obligation may also be subject to restrictions on transfer and may be considered illiquid. If a Credit Event (or a Termination Event) occurs in respect of the Reference Entity, any resulting diminution in market value of the Reference Obligation could be further magnified by reason of such limited liquidity. • The Issuer has not undertaken any legal or other due diligence in respect of the Reference Entity, and does not make any representation or warranty, express or implied, as to the credit quality of the Reference Entity. Noteholders will not be entitled to receive grossed-up amounts to compensate for any such tax, duty, withholding or other payment. • While the Notes have been issued in RON the Issuer will pay principal on the Notes in EUR instead of in RON. This presents certain risks relating to currency conversions if an investor's financial activities are denominated principally in a currency or currency unit (the "Investor's Currency") other than EUR. • Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate and/or restrict the convertibility or transferability of currencies within and/or outside of a particular jurisdiction. As a result, investors may receive less principal than expected, or receive it later than expected or not at all. • The Notes are subject to the FX Provisions. The occurrence of a FX Convertibility Event and/or FX Transferability Event may have a significant adverse effect on the value of and the return on the Notes. • Even though the Notes will be listed there can be no assurance that a secondary market for the Notes will develop or, if it does, that it will provide holders with liquidity for the life of the Notes. A decrease in the liquidity of the Notes may cause, in turn, an increase in the volatility associated with the price of the Notes. Any investor in the Notes must be prepared to hold the Notes for an indefinite period of time or until redemption of the Notes. If any person begins making a market for the Notes, it is under no obligation to continue to

Section E – Offer

E.4	Interests of natural and legal persons involved in the offer and issue of the Notes, including conflicting interests:	So far as the Issuer is aware, no person involved in the offer of the Notes has an interest material to the offer.
E.7	Estimated expenses charged to investors by the Issuer:	Not Applicable; no expenses are charged to investors by the Issuer.

PART TWO: SECURITIES NOTE

RISK FACTORS

Investing in the Notes involves risks. The Notes are not principal protected and the market value of the Notes may fluctuate during their term. Prospective investors risk losing their entire investment or part of it. See Parts 1 and 2 of the “Risk Factors” section of Chapter 1 of the Base Prospectus (incorporated by reference into this Securities Note) and, in addition, the risk factors below for information on the risk factors to be taken into account when considering an investment in the Notes. Potential investors are strongly recommended to consult with their independent financial advisers before making any investment decision.

Risk Factor in relation to Credit Linkage

Terms used but not defined below are as defined in the Terms and Conditions of the Credit Linked Notes, as set out in Chapter 2, Part 1 and Chapter 5, Part 1(A) and Part 1(B) of the Base Prospectus.

Investors should note that the Notes differ from ordinary debt securities in that the amount of principal payable by the Issuer is dependent on whether a Credit Event (or a Termination Event) has occurred in respect of the Reference Entity. In certain circumstances the value paid to Noteholders on redemption may be less than their original investment and may in certain circumstances be zero. Investors should have sufficient knowledge and experience in financial and business matters to evaluate the merits and risks of investing in the Notes as well as access to, and knowledge of, appropriate analytical tools to evaluate such merits and risks in the context of their financial situation.

Investors in the Notes will be exposed to the credit risk of the Reference Entity from the Credit Event Backstop Date. The Credit Event Backstop Date may be a date prior to the Issue Date of the Notes. Prospective purchasers of the Notes should conduct their own investigations and, in deciding whether or not to purchase the Notes, should form their own views of the merits of an investment related to the Notes based upon such investigations. In particular, each investor contemplating purchasing any Notes should make its own appraisal of the Reference Entity. If in doubt, potential investors are strongly recommended to consult with their independent financial advisers before making any investment decision. The Issuer nor any other person on its behalf makes any representation or warranty, express or implied, as to the credit quality of the Reference Entity. The Issuer may have acquired, or during the term of the Notes may acquire, confidential information with respect to the Reference Entity and is not required to disclose this information to the Noteholder or any other party.

The Noteholders will have a contractual relationship only with the Issuer and not with any obligor in respect of any Reference Obligation or any Reference Entity. Consequently, the Notes will not constitute a purchase or other acquisition or assignment of any interest in any Reference Obligation or the Reference Entity. Holders of the Notes will have rights solely against the Issuer and will have no recourse against the obligor in respect of any Reference Obligation or the Reference Entity. The Noteholders will not have any rights to acquire from the Issuer (or to require the Issuer to transfer, assign or otherwise dispose of) any interest in any Reference Obligation or the Reference Entity.

The Notes are linked to the creditworthiness of the Reference Entity. The likelihood of a Credit Event (or a Termination Event) occurring in respect of the Reference Entity will generally fluctuate with, among other things, the financial condition and other characteristics of the Reference Entity, general economic conditions, the condition of certain financial markets, political events, developments or trends in any particular industry and changes in prevailing interest rates.

The Reference Obligation may have no, or only a limited, trading market. The liquidity of Reference Obligation will generally fluctuate with, among other things, the underlying liquidity of the loan and bond markets, general economic conditions, domestic and international political events, developments or trends in a particular industry

and the financial condition of the Reference Entity. The financial markets have experienced periods of volatility and reduced liquidity which may re-occur and reduce the market value of the Reference Obligation.

The Reference Obligation may also be subject to restrictions on transfer and may be considered illiquid. If a Credit Event (or a Termination Event) occurs in respect of the Reference Entity, any resulting diminution in market value of the Reference Obligation could be further magnified by reason of such limited liquidity.

The terms and conditions of the Notes do not incorporate by reference the definitions and provisions of the 2003 ISDA Credit Derivatives Definitions as supplemented by the March 2009 Supplement and July 2009 Supplement (the "Credit Derivatives Definitions") and there may be differences between the definitions used in the Prospectus and the Credit Derivatives Definitions. Consequently, investing in the Notes is not exactly equivalent to investing in a credit default swap that incorporates the Credit Derivatives Definitions.

While ISDA has published and supplemented the Credit Derivatives Definitions in order to facilitate transactions and promote uniformity in the credit derivative market, the credit derivative market has evolved over time and is expected to continue to change. Consequently, the Credit Derivatives Definitions and the terms applied to credit derivatives, including credit linked securities, are subject to interpretation and further evolution. Past events have shown that the views of market participants may differ as to how the Credit Derivatives Definitions operate or should operate. As a result of the continued evolution in the market, interpretation of the Notes may differ in the future because of future market standards. Such a result may have a negative impact on the Notes.

Future amendments or supplements to the terms applicable to credit derivatives generally will only apply to the Notes that have already been issued if the Issuer and the Noteholders agree to amend the Notes to incorporate such amendments or supplements and other conditions to amending the Notes have been met.

Credit Derivatives Determinations Committees were established pursuant to the March 2009 Supplement to the 2003 ISDA Credit Derivatives Definitions to make determinations that are relevant to the majority of the credit derivatives market and to promote transparency and consistency.

In making any determination in its capacity as Calculation Agent or Issuer, it may have regard to decisions made by announcements, determinations and resolutions made by ISDA and/or the ISDA Credit Derivatives Determinations Committees. Such announcements, determinations and resolutions could affect the redemption and settlement of the Notes (including the quantum and timing of payments and/or deliveries on redemption). For the avoidance of doubt, neither the Issuer nor the Calculation Agent accept any liability to any person for any determinations, redemption, calculations and/or delay or suspension of payments and/or redemption of the Notes resulting from or relating to announcements, publications, determinations and resolutions made by ISDA and/or any Credit Derivatives Determinations Committee.

Further information about the Credit Derivatives Determinations Committees may be found at www.isda.org/credit. The Global Issuer has terminated its membership as a Non-dealer Consultative Member in the Credit Derivatives Determinations Committees, which termination has become effective in May 2011. The Issuer retains the right to deliberate on matters having arisen prior to the effective date of its membership termination (and in such capacity it need not have regard to the interests of any Noteholders when taking action or casting any vote). Further information about the Credit Derivatives Determinations Committees may be found at www.isda.org/credit.

By subscribing for or purchasing the Notes, each Noteholder shall be deemed to agree that (i) no DC Party and no legal counsel or other third-party professional hired by a DC Party in connection with such DC Party's performance of its respective duties under the Rules and/or any relevant Credit Derivatives Auction Settlement Terms, as applicable, shall be liable to Noteholders, and (ii) no DC Party and no legal counsel or other third-party professional hired by a DC Party in connection with such DC Party's performance of its respective duties under the Rules and/or any relevant Credit Derivatives Auction Settlement Terms is acting as fiduciary for, or as an advisor to, Noteholders.

The Issuer's obligations in respect of the Notes exist regardless of the existence or amount of that Issuer's and/or any of its affiliates' credit exposure to a Reference Entity and the Issuer and/or any affiliate need not suffer any loss nor provide evidence of any loss as a result of the occurrence of a Credit Event.

Exposure to the Reference Entity

The creditworthiness of the Reference Entity may be dependent upon economic, political, financial and social events locally and globally. There can be no assurance that such factors will not adversely affect the Reference Entity's financial condition and performance and, in turn, the market value and/or the redemption price of the Notes. The Issuer has not undertaken any legal or other due diligence in respect of the Reference Entity, and does not make any representation or warranty, express or implied, as to the credit quality of the Reference Entity. This Prospectus does not provide any further information with respect to the Reference Entity (other than its identity) or the obligations thereof, its creditworthiness or the likelihood of the occurrence of a Credit Event.

Prospective investors should note that whilst the market value of the Notes is linked to the creditworthiness of the Reference Entity and will be influenced (positively or negatively) by it, any change may not be comparable and may be disproportionate. It is possible that while the creditworthiness of the Reference Entity is increasing, the value of the Notes may fall.

The Reference Entity may be replaced due to events beyond the control of the Issuer, in which case the Reference Entity may be replaced by a Successor. Each such replacement would be outside of the control of the Noteholders, following which the Notes would be subject to the credit risk of such Successor. As a result, the Notes may become linked to the credit of certain entities even though such entities were not specified in the terms and conditions of the Notes upon issuance. In case a Credit Event has occurred in respect of the Reference Entity, the Reference Entity will not be replaced by a Successor.

Connection of the Reference Entity to emerging markets

The Reference Entity is an emerging market country and may therefore be subject to significant fluctuations attributable to, among other things, nationalisation, expropriation or taxation, currency devaluation, foreign exchange control, political, social or diplomatic instability or governmental restrictions. The capital markets in such emerging market country may have substantially less volume, and are generally less liquid and more volatile, than those in more developed markets. Disclosure and regulatory requirements in such emerging market could be less stringent than in other markets with a low level of monitoring and limited and uneven enforcement of existing regulations. The occurrence of any of the foregoing may have a significant adverse effect on the value of and return on the Notes. Prospective investors risk losing their entire investment or part of it.

A credit rating reduction may result in a reduction in the trading value of the Notes

The value of the Notes may be expected to be affected, in part, by Noteholders' general appraisal of the creditworthiness of the Issuer and/or the ING Group. Such perceptions are generally influenced by the ratings accorded to the outstanding securities of the Issuer by standard statistical rating services, such as Moody's, Standard & Poor's and Fitch. A reduction in the rating, if any, accorded to outstanding debt securities of the Issuer by one of these or other rating agencies could result in a reduction in the trading value of the Notes.

No principal protection

These notes are not principal protected. Upon the early redemption of Notes, the redemption amount of the Notes may be significantly lower than nominal amount of such Notes or, in some circumstances, be zero.

Conflicts of Interest

The Issuer and its affiliates may have other existing or future business relationships with the Reference Entity and will pursue actions and take steps that they deem necessary or appropriate to protect its or their interest arising therefrom regardless the consequences to the Noteholders. Furthermore, the Issuer and its affiliates may buy, sell or

hold positions in obligations of, or act as investment or commercial bankers, advisers or fiduciaries to the Reference Entity.

Limited Liquidity and Restrictions on Transfer

There may not be any market for the Notes and, as a result, a purchaser must be prepared to hold such Notes for an indefinite period of time or until the maturity thereof. It is unlikely that an active secondary market for the Notes will develop and purchasers of the Notes may find it difficult or uneconomic to liquidate their investment at any particular time. The Notes may be subject to certain transfer restrictions and may only be transferable to certain transferees and in limited circumstances. Such transfer restrictions may further limit the liquidity of the Notes.

Early Redemption

The Notes may redeem prior to their Maturity Date and/or Final Payment Date due to certain events set forth in the conditions applicable to the Notes, which events include events of default in respect of the Issuer. In such instances, amounts payable to the Noteholders will be dependent, among other factors, the prevailing fair market value of the notes, taking into account (without limitation) the cost or gain to the Issuer in amending or liquidating any related hedging or trading position(s) and any additional costs, fees or taxes relating thereto. It should be understood that in such circumstances, it is likely that the amount due to holders of the Notes may be less than the outstanding principal amount of the Notes.

Adjustment events

The Notes include that following the occurrence of an Adjustment Event (i.e. a Regulatory Change Event or Tax Event), the Final Redemption Amount shall be reduced by any loss suffered, or costs or expenses incurred, by the Issuer in connection with the Notes as a result of the occurrence of such Adjustment Event, as determined by the Calculation Agent, so as to put the Issuer in the same position in which it would have been but for the occurrence of such Adjustment Event.

Taxation and no gross-up

Each investor in the Notes will assume and be solely responsible for any and all taxes of any jurisdiction or governmental or regulatory authority including, without limitation, any state or local taxes or other similar assessment or charges that may be applicable to any payment to such holder in respect of the Notes. In the event that any withholding tax or deduction for tax is imposed on payments on the Notes by the Issuer to the Noteholders, it should be understood that such Noteholders will not be entitled to receive amounts to compensate for such withholding tax.

All payments made by the Issuer in respect of the Notes shall be made subject to any tax, duty, withholding or other payment which may be required to be made, paid, withheld or deducted. Noteholders will not be entitled to receive grossed-up amounts to compensate for any such tax, duty, withholding or other payment.

Payment of Delivery Expenses and Costs

Following the delivery of a Termination Event Notice or Credit Event Notice, each Noteholder is required to pay the Delivery Expenses and Costs within five Business Day following the day on which the Notice of Deliverable Obligation(s) is delivered. In case the Noteholder fails to make these payments in full to the Issuer before or on such date, the obligation of the Issuer to Deliver the Deliverable Obligation Entitlement shall cease and each Note shall be redeemed at zero. Potential investors should not invest in the Notes unless it has the financial and operational capabilities to make the required payments within this period, should it be required to do so.

Exchange rates and exchange controls

The Notes are subject to the FX Provisions (as defined in paragraph 39 of Part A of the “Terms and Conditions of the Notes” section of the Securities Note). If the Issuer determines, in its sole discretion, that any payment due on the Notes cannot, or cannot reasonably, be made following an FX Convertibility Event and/or FX Transferability Event, then such payment may be postponed until the next Payment Day on which such payment can, in the sole

discretion of the Issuer, reasonably be made. If the Issuer determines, in its sole discretion, that any payment due on the Notes cannot, or cannot reasonably, be made following an FX Convertibility Event and/or FX Transferability Event for a period of five years from the date on which payment was originally due to be made but for the FX Convertibility Event and/or the FX Transferability Event, as the case may be, then the Issuer shall be entitled to all amounts in any account opened by it pursuant to Condition 20(c) of the General Conditions, including accrued interest, if any, and no additional amounts shall be payable to the relevant Noteholder. The occurrence of a FX Convertibility Event and/or FX Transferability Event may have a significant adverse effect on the value of and the return on the Notes.
